SURVEY AND LEVERAGING OF GOVERNMENTAL PROGRAMS FOR RECOVERY **VIA ZOOM**

Descripción del curso: In this course we will review with more details the different type of programs available for disaster recovery created with CDBG-DR and CDBG-MIT funds. Particular attention will be given to those programs created by the Puerto Rico Housing Authority, in which non-profits, small and medium businesses can participate and insert themselves in the recovery process. Also, we will have the opportunity to hear the experience of these types of programs in Louisiana, and hear from the challenges faced there and how they have been addressed. There will be a dialogue session between the panelists in order to compare notes and answer questions of the participants.
